From the Principal

Year 8 is a significant year for our students as they integrate into a typical Secondary Academic program. The College endeavours to develop our students' gifts and talents by providing a wide range of opportunities with particular attention given to the teaching of literacy and numeracy.

The College is keen to provide our students with the necessary knowledge, skills and attitudes necessary to become successful lifelong learners. The curriculum we offer continually promotes students maximising their potential.

Our curriculum also promotes our College values of: Respect, Heritage, Commitment, Adaptability, Friendship and Community. Our hope is that when students graduate from this College, they do so as our College motto states, being "Prepared for all Good Works".

Best wishes for Year 8.

*Mr Simon Harvey
Principal*

Student Life at St Norbert College

Student Ministry

Student Ministry creates opportunities for all St Norbert College students to become leaders in the College community. Through participating in a retreat and Christian service experiences, students discover the power of God in their lives and are encouraged to develop and shine their love out to others.

The Year 8 students also participate in a Reflection Day run by the Youth Mission Team and participate in a number of engaging activities to deepen their relationship with God.

Christian Service Learning

“Christian Service Learning in Catholic schools is a critical educational activity that provides opportunities for students to reflect on and integrate the principles of Catholic Social Teachings into practical experiences of service to others in society.”

Service to others is an excellent vehicle for bringing love and goodness alive in a person’s life. Students in Year 8 have a great opportunity to give service to others through the “Serving at Home” project.

In this project all Year 8 students are required to give seven hours service to their families over a seven week period in Term 3. There are many ways in which students can assist at home. The service may range from cooking a meal for the family through to helping to clean out the shed.

Through serving others in this way students learn of the value of belonging to and contributing to a community. In this case perhaps the most important community they will ever belong to – their families.

Planning Your Course

Course Selection

In Year 8 students at St Norbert College are given a broad experience across all nine learning areas – Religious Education, English, Health and Physical Education, Humanities, Languages Other Than English (Italian or Japanese), Mathematics, Science, Technologies and The Arts (visual and performing). To better cater for the needs of individual students, classes in English, Humanities, Mathematics and Science, are divided into Extension, Mainstream and Enrichment classes. Students are placed in these classes based on results from Year 7. Movement is possible between these classes and when it occurs, usually happens at the end of each Semester on teacher recommendation.

A wide range of Electives is offered to students. Every effort is made to place students where they wish to go. Some Electives, due to their nature are year-long. Once in an Elective, it is expected that students will remain in them.

According to the Australian Curriculum, students in Year 8 must select a semester or year-long course from each of the following learning areas:

1. Languages or Language Support.
2. Digital Technologies
3. Design & Technologies
4. Visual Arts
5. Performing Arts

Within each learning area, students have a number of elective courses that they choose in order to select a mix of subjects that best suits their interests and abilities.

Students in Year 8 may choose between *Japanese* or *Italian* to study for the whole year. It is recommended that students choose a language if they wish to study this language in future years. Alternatively, *Language Essentials* is a compulsory elective for those students whose results in Year 7 English, Italian and Japanese indicate that they need more support to develop their literacy skills to an appropriate level. Students who are placed in *Language Essentials* do not study either Italian or Japanese.

English as an Additional Language/Dialect is a compulsory elective for students who experience difficulties with literacy and whose first language is not English. Similarly, Numeracy Support is a compulsory elective for who experience difficulties in some aspects of their numeracy. Students who would benefit from these programs will be identified by their teachers in consultation with the Head of Learning Area.

Changing Elective Courses

All elective choices are compiled and a timetable grid is created which represents the best possible fit of those choices. Due to timetable constraints it may be necessary at this point to call on a student's 'Reserve' elective selection.

Only students who have been allocated 'Reserve' Electives may apply to change electives. No change can be guaranteed. This is to give the student enough time to successfully complete the assessment tasks and the teacher sufficient time to be able to report on a student's progress fairly and accurately.

It should be noted that Electives only run if there are sufficient numbers to justify a class. The DEADLINE for changing Electives is the end of Week 2 of each Semester.

Curriculum Overview

Compulsory	Student Choice <i>Students select Electives from this list</i>

In Year 8, students study four electives per semester for eight periods per week. Students must select **one** unit from each of the following categories:

- | | |
|---|--|
| <ul style="list-style-type: none"> - Design & Technologies - Digital Technologies | <ul style="list-style-type: none"> - Visual Arts - Performing Arts |
|---|--|

Additionally, Year 8 elective choices must include a language elective that is year-long. Students choose either a Second Language (Italian or Japanese) or Language Essentials (developing literacy skills).

*8 English as an Additional Language/Dialect is a recommended elective for students with specific literacy needs. It runs for one semester only.

#8 Specialised Basketball runs for the whole year and counts as two of the semester electives.

8 Religious Education (08REL)

Minimum Entry Requirements

No Minimum Entry Requirement

Description

The Religious Education learning area focuses on the knowledge and understanding of the Gospel as it is handed on by the Catholic Church to those who follow Christ in today's world. The content and processes of the learning area are intended to ensure that students, through a process of cultural, systematic and critical reflection, learn the teachings of the Gospels and understand what it means to be a Christian and how Christians live their lives.

In **Year 8** students focus on four main themes: Belonging and Acceptance in Catholic communities; how throughout history there has been a universal need for God; Creation, God's original plan, how humans damaged this plan and how Jesus restored it; and how we can grow in the image of God through the sacraments of Baptism, Confirmation and the Eucharist.

8 English - Extension (08ENX)

Minimum Entry Requirements

Selection will be based on results obtained through external and College testing. The Head of Learning Area and subject teacher will review a student's position in the Extension class at the end of each Semester.

Description

Students in English Extension will be challenged to expand their knowledge of Reading, Writing, Viewing, Listening and Speaking through building their repertoire of comprehending and analysis skills. They will study a range of complex texts and develop an understanding of their individual learning style. Students will learn to question the world around them and how texts are a reflection of society's values and attitudes.

Future Pathways

Year 9 English - Extension or, depending on results, Year 9 English Mainstream

8 English - Mainstream (08ENM)

Minimum Entry Requirements

Selection will be based on results obtained through external and College testing. The Head of Learning Area and subject teacher will review a student's position in the Mainstream classes at the end of each Semester.

Description

Students in English Mainstream will develop their knowledge of Reading, Writing, Viewing, Listening and Speaking through building comprehending and analysis skills. They will study a range of familiar and challenging texts and develop an understanding of how each student has their own learning style. Students will develop an understanding of the world around them and how texts are a reflection of society.

Future Pathways

Year 9 English - Mainstream or depending on results, Year 9 English Extension or Year 9 English Enrichment

8 English - Enrichment (08ENE)

Minimum Entry Requirements

Selection will be based on results obtained through external and College testing. The Head of Learning Area and subject teacher will review a student's position in the Enrichment class at the end of each Semester.

Description

English Enrichment will cater for students who experience difficulties with some aspects of their literacy. Students will be taught strategies and assisted to develop their understanding of reading, writing and comprehending. The aim of this assistance is to enhance student's literacy skills in order to enhance their performance across all Learning Areas.

Future Pathways

Year 9 English - Enrichment or, depending on results, Year 9 English - Mainstream

8 English as an Additional Language/Dialect (08ELD)

Minimum Entry Requirements

Selection will be based on a student meeting the EALD criteria. The Head of Learning Area and subject teacher will review a student's position in the English as an Additional Language/Dialect class at the end of each Semester.

Description

Students for whom English is an additional language/dialect benefit from intensive instruction in Standard Australian English so that they are literate in SAE, use of SAE is central to their success in external testing in NAPLAN and OLNA. They will concentrate on the acquisition of various language forms, skills, strategies, language structures, vocabulary and systems of understanding language and learning. Study of Australian lifestyle and culture helps build an understanding of the society they live in.

Future Pathways

Year 9 English as an Additional Language/Dialect

8 English - Language Essentials (OBLAN)

Minimum Entry Requirements

Selection for this course will be based on a student's progress in Year 7 Italian, Japanese and English. The Literacy Support Teacher, the Year 7 Coordinator or Head of Learning Area may also make recommendation for the course.

Description

Whilst studying Language Essentials, students will continue to develop their literacy skills in order to communicate confidently in and out of school. Through a range of reading, viewing, speaking, listening and writing activities, students will come to the realisation that language is fluid. This will enable students to modify their language use for different purposes in a range of contexts.

8 Health Education (08HEA)

Minimum Entry Requirements

No Minimum Entry Requirement

Description

The Year 8 Health curriculum content provides opportunities for students to further examine changes to their identity and ways to manage them that assist students to develop, enhance and exhibit attitudes and values that promote a healthy lifestyle. They continue to develop and refine decision-making skills and apply them to a range of situations.

Students explore concepts that affect them and their peers as teenagers and young adults, in line with the Western Australian Curriculum.

Future Pathways

Year 9 Health Education

8 Physical Education (OBPED)

Minimum Entry Requirements

No Minimum Entry Requirement

Description

Students continue to broaden their repertoire of specialised movement skills and knowledge of sophisticated tactical thinking skills, and apply these to an expanding array of physical activity contexts. They build on skills to analyse their own and others' performance and use basic terminology and concepts to describe movement patterns and suggest ways to improve performance outcomes

Students continue to reflect on, and refine, personal and social skills that support inclusive participation and fair play, and contribute to positive team cohesion.

Semester One is designed as an introduction of the principles of human movement in aquatics; these are essential elements that will be developed throughout Years 8 to 10. Team sports will also encourage team participation.

Semester Two will provide students with the opportunity to develop their skills of throwing, catching, striking, and body management.

Exhibiting Attitudes and Values that promote a healthy lifestyle are particular Western Australian Curriculum components that will be encouraged alongside the challenge of personal excellence.

Future Pathways

Year 9 Physical Education

8 Specialised Basketball (OBSPB)

Minimum Entry Requirements

By selection only

Description

Students will be selected to participate in this course based on an application process that occurs in the previous year. Written applications, fitness and skill testing, references from club basketball coaches and analysis of school reports will form the basis for selection.

Expert coaches from the College will develop a wide range of fundamental basketball skills and strategies, enhance fitness levels, and theoretical components will focus on score bench operation.

Students will play for St Norbert College teams in a range of competitions. Students selected for the Specialised Basketball Program will choose Specialised Basketball as an elective in both Semester 1 and 2.

Future Pathways

Year 9 Specialised Basketball

8 Sport and Recreation (OBSRS)

Minimum Entry Requirements

A willingness and capacity to participate in physical activity

Description

An elective designed to give students additional opportunities to be physically active and further the development of their Health and Physical Education Learning Area outcomes. Sport and Recreation Skills uses various sporting and outdoor recreation contexts to build fitness, skills and strategies and self-management skills. There is a focus on the SEPEP model where students implement skills and strategies to improve performance such as leadership, motivation and team work.

Future pathways

Year 9 Sport and Recreation

Humanities and Social Sciences

8 Humanities and Social Sciences - Extension (08HUX)

Minimum Entry Requirements

Selection will be based on academic results supplied to the College on enrolment and through external and College testing in Year 7. The Head of Learning Area – Humanities and Social Sciences and subject teacher will review a student's position in the Extension class each term.

Description

The Extension program seeks to further develop the skills and abilities of our talented students by fostering an environment, which provides challenge and where students can work with peers who share similar interests, aspirations and abilities.

Extension students will cover the same core program as mainstream students; however the learning, teaching and assessment strategies used will reflect the level of ability of students in these classes.

Students will be given the opportunity to develop more advanced analytical, reasoning and literacy skill through participation in various competitions and external programs.

Future Pathways

Year 9 HASS - Extension or depending on results Year 9 HASS - Mainstream

8 Humanities and Social Sciences - Mainstream (08HUM)

Minimum Entry Requirements

Selection will be based on academic results supplied to the College on enrolment and through external and College testing. The Head of Learning Area – Humanities and Social Sciences and subject teacher will review a student's position in the Mainstream classes.

Description

In Year 8, Humanities and Social Sciences consist of Economics and Business, Geography, History, Civics and Citizenship.

Students develop increasing independence in critical thinking and skill application, which includes questioning, researching, analysing, evaluating, communicating and reflecting. They apply these skills to investigate events, developments, issues and phenomena, both historical and contemporary.

Students continue to build on their understanding of the concepts of the Westminster system, democracy and participation. They investigate the types of law in Australia and how they are made. They consider the responsibilities and freedoms of citizens, and how Australians can actively participate in their democracy. Students explore the different perspectives of Australian identity.

The concept of markets is introduced to further develop students understanding of the concepts of interdependence, making choices and allocation. They consider how markets work and the rights, responsibilities and opportunities that arise for businesses, consumers and governments. Work and work futures are explored as students consider the influences on the way people work now and consider how people will work in the future. Students focus on national and regional issues, with opportunities for the concepts to also be considered in relation to local community, or global, issues where appropriate.

The concepts of place, space, environment, interconnection, sustainability and change continue to be developed as a way of thinking and provide students with the opportunity to inquire into the significance of landscapes to people and the spatial change in the distribution of populations. They apply this understanding to a wide range of places and environments at the full range of scales, from local to global, and in a range of locations.

Students develop their historical understanding through key concepts, including evidence, continuity and change, cause and effect, perspectives, empathy, significance and contestability. These concepts are investigated within the historical context of the end of the ancient period to the beginning of the modern period, c. 650 AD (CE) – 1750. They consider how societies changed, what key beliefs and values emerged, and the causes and effects of contact between societies in this period.

Future Pathways

9 HASS - Mainstream or depending on results Year 9 HASS - Extension or Enrichment

8 Humanities and Social Sciences - Enrichment (08HUE)

Minimum Entry Requirements

Selection will be based on academic results supplied to the College on enrolment and through external and College testing. The Head of Learning Area – Humanities and Social Sciences and Social Sciences, Learning Support Co-ordinator and subject teacher, will review a student's position in the Enrichment class.

Description

The Humanities and Social Sciences Enrichment class is made available to those students needing extra help with literacy and organisation. There is a special focus on reading, writing and comprehension within a modified Humanities and Social Sciences course using similar contexts to those of Mainstream classes. Assessment and learning activities are adjusted to the needs of the students.

Future Pathways

9 HASS - Enrichment or depending on results 9 HASS – Mainstream

8 Italian (08ITA)

Ms Diana Tersigni

Phone: 9350 5433 / Email: dtersigni@norbert.wa.edu.au

Minimum Entry Requirements

Some experience of Italian at school

Description

This course is designed to introduce new learners of Italian to the Italian language and culture and to consolidate and build on the knowledge of learners with some background in Italian. There is an emphasis on increasing confidence in oral communication.

Students access a range of authentic texts and engage in tasks that encompass a variety of modes (listening, speaking, reading and writing). They discover geographical and cultural aspects of Italy including awareness of contemporary ways of life. This is achieved through topics targeted at the interests of learners at this level of learning.

Students complete a series of written, aural and oral tasks and assessments designed to help them improve their language skills. They are required to demonstrate all of the Language outcomes. This course is a prerequisite to the Year 9 Italian course and is recommended for students who have taken some Italian classes in primary school and Year 7.

Topics:

- Physical & Character description of person
- Nationalities and language
- Methods of Transport
- Animals
- Food: Typical Italian breakfast
- Numbers 20 -100
- Colours & Clothing
- Family
- My Home

Future Pathway

Year 9 Italian

8 Japanese (08JAP)

Mr Tony Godden

Phone: 9350 5433 / Email: agodden@norbert.wa.edu.au

Minimum Entry Requirements

No previous experience of studying Japanese is required.

Description

Year 8 Japanese is aimed at increasing communicative competence by means of tasks in all the skills of speaking, listening, reading, writing and cultural knowledge associated with the topics addressed. The course will require students to be organised and develop regular study habits. Students will become competent in reading and writing Hiragana and some Kanji. Each student will have access to Japanese Languages Perfect online.

The topics covered include various aspects of Japanese culture that will be encountered when travelling or doing a homestay in Japan. Students will decipher a range of authentic texts in various mediums such as film, email, and television.

The course is suited to motivated students who are considering travelling to Japan and the study of Japanese in the future.

Topics

- All about me - Likes and Dislikes
- Foods and drinks – ordering and prices
- Sport and Hobbies
- Daily routines and activities
- Where you live
- School and clubs
- Family
- Telling the Time

Future Pathways

Year 9 Japanese

Mathematics

Mathematics Pathways

MATHEMATICS AT ST NORBERT COLLEGE

PATHWAYS FOR MATHEMATICS

BY INVITATION ONLY

8 Mathematics - Extension (08MAX)

Minimum Entry Requirements

Selection will be based on results obtained in Year 7 and through external and College testing. A student's position in the Extension class is reviewed by the Head of Learning Area and subject teacher at the end of each Semester.

Description

Students are required to demonstrate a higher level of achievement in five of the Mathematics outcome groups by completing Tests and Investigations. The outcomes will cover the following:

- Number skills involving decimals, fractions, percentages and negative numbers will be developed.
- Measurement work will include scale diagrams, perimeter, area and volume.
- Space includes working with angles, parallel lines, polygons, the Cartesian Plane and will include three dimensional concepts.
- Algebra will be introduced and the key concepts of variables and solving equations using backtracking will be taught.
- Chance & Data includes the basic ideas of probability and collecting, organising and analysing data.

Future Pathways

9 Mathematics - Extension or depending on results 9 Mathematics – Advanced Mainstream.

8 Mathematics – Advanced Mainstream (OBMAA)

Minimum Entry Requirements

Selection will be based on results obtained in Year 7 and through external and College testing. The Head of Learning Area and subject teacher will review a student's position in the Mainstream classes at the end of each Semester.

Description

Students are required to demonstrate a strong level of achievement in five of the Mathematics outcome groups by completing Tests and Problem-Solving Tasks. The outcomes will cover the following:

- Number skills involving decimals, fractions, percentages and negative numbers will be developed.
- Measurement work will include scale diagrams, perimeter, area and volume.
- Space includes working with angles, parallel lines, polygons, the Cartesian Plane and will include three dimensional concepts.
- Algebra will be introduced and the key concepts of variables and solving equations using backtracking will be taught.
- Chance & Data includes the basic ideas of probability and collecting, organising and analysing data.

Future Pathways

9 Mathematics – Advanced Mainstream or depending on results 9 Mathematics - Extension or General Mainstream.

8 Mathematics – General Mainstream (OBMGM)

Minimum Entry Requirements

Selection will be based on results obtained in Year 7 and through external and College testing. The Head of Learning Area and subject teacher will review a student's position in the Mainstream classes at the end of each Semester.

Description

Students are required to demonstrate a standard level of achievement in five of the Mathematics outcome groups by completing Tests and Problem-Solving Tasks. The outcomes will cover the following:

- Number skills involving decimals, fractions, percentages and negative numbers will be developed.
- Measurement work will include scale diagrams, perimeter, area and volume.
- Space includes working with angles, parallel lines, polygons, the Cartesian Plane and will include three dimensional concepts.
- Algebra will be introduced and the key concepts of variables and solving equations using backtracking will be taught.
- Chance & Data includes the basic ideas of probability and collecting, organising and analysing data.

Future Pathways

9 Mathematics - General Mainstream or depending on results 9 Mathematics – Advanced Mainstream or Enrichment.

8 Mathematics - Enrichment (OBMAG)

Minimum Entry Requirements

Selection will be based on results obtained from Year 7 and through external and College testing. The Head of Learning Area and subject teacher will review a student's position in the Enrichment classes at the end of each Semester.

Description

Students experiencing difficulties with their Mathematics will be placed into the smaller Enrichment class, which will still address five of the Mathematics outcome groups but in a simplified manner.

Future Pathways

9 Mathematics - Enrichment or depending on results 9 Mathematics – General Mainstream

Science

8 Science - Extension (08SCX)

Minimum Entry Requirements

Selection will be based on results obtained through Year 7 Science results and College testing. The Head of Learning Area and subject teacher will review a student's position in the Extension class at the end of each term.

Description

Students who would benefit from a more rigorous range of learning activities are placed in an Extension class. A differentiated program from the mainstream classes is undertaken, however, the core concepts remain the same. Students will study content based on the Australian Curriculum for Science but are given opportunity for extension through projects, competitions and investigations. The learning, teaching and assessment strategies used reflect the level of ability of students in these classes. The content covered in this program includes; cells and microscopes, chemical and physical change, energy classification, the rock cycle and the science behind natural disasters. Students use experimentation to isolate relationships between components in systems and explain these relationships through increasingly complex representations. They make predictions and propose explanations, drawing on evidence to support their views. Learning technology is integrated into a number of learning activities and students will be expected to demonstrate mastery of them.

Future Pathways

Year 9 Science – Depending on results Year 9 Extension or Mainstream.

8 Science - Mainstream (OBSCM)

Minimum Entry Requirements

Selection will be based on results obtained through Year 7 Science results and College testing. The Head of Learning Area and subject teacher will review a student's position in the Mainstream classes at the end of each term.

Description

Most students will experience the Science program in a mainstream class. The mainstream program reflects the syllabus contained in Australian Curriculum. Students will build on knowledge gained in Year 7 to deepen their understanding of cells, microscopy, changes in matter, and chemical and physical change. They will be introduced to the types of heat transfer and the rock cycle. Students will be required to work in a variety of ways, both individually and collaboratively while engaging in both theoretical and practical work. Learning technology is integrated into a number of learning activities and students will be expected to demonstrate mastery of them.

Future Pathways

Year 9 Science – Depending on results Year 9 Extension, Mainstream or Enrichment.

8 Science - Enrichment (OBSCE)

Minimum Entry Requirements

Selection will be based on results obtained through Year 7 Science results and College testing. The Head of Learning Area and subject teacher will review a student's position in the Enrichment class at the end of each term.

Description

The Enrichment course is available to students needing a modified curriculum that focuses on development of literacy skills, in a science context. Students will focus on the same core concepts as the Mainstream science course but the curriculum is adjusted to cater for the students' learning needs. Students will work both individually and collaboratively in theory and practical work. Learning technology will also be integrated into a number of activities which are designed to both engage students and deepen their understanding of core scientific understandings.

Future Pathway

Year 9 Science – Depending on results Year 9 Enrichment or Mainstream.

Design & Technologies

8 Food Science and Technology (08FST)

Mrs Leon Rogers

Phone: 9350 5433 / Email: lrogers@norbert.wa.edu.au

Minimum Entry Requirements

No Minimum Entry Requirement

Description

This practical course introduces students to basic food preparation techniques and skills, with the focus on quick and effective meals that can be prepared at home. The course covers preparing breakfasts from around the world, and healthy lunch alternatives for school. Students look at the benefits of Food Models when making personal decisions on what to eat, preparing food for others, and are introduced to the workings of a commercial kitchen.

Future Pathways

9 Food Science and Technology

8 Materials - Metal (08MET)

Mr Brad Collins

Phone: 9350 5433 / Email: bcollins@norbert.wa.edu.au

Minimum Entry Requirements

No Minimum Entry Requirement

Description

This course introduces students to the metal workshop and helps them gain an insight into simple processes. Students learn basic skills and techniques in forming and fabricating ferrous and non-ferrous materials with simple metalworking hand tools and equipment.

Both hand and machine skills are developed through the construction of various metalwork models. The main focus is on accurate reading of plans and an understanding of health and safety procedures in the workshop environment.

Areas to be covered include the use of guillotines, benders, and use of various hand tools.

Future Pathways

9 Materials - Metal

8 Materials - Textiles (08TEX)

Mrs Samantha Mark

Phone: 9350 5433 / Email: smark@norbert.wa.edu.au

Minimum Entry Requirements

No Minimum Entry Requirement

Description

This fun, hands on, creative subject is designed for those students who like to get in and make things for themselves. Students are introduced to fabric and textiles in the design and production of a number of personal items. They learn to use a sewing machine and basic sewing equipment in the development of their skills. Creativity is developed and applied to several items and garments. Life skills are encouraged using the technology process to design, produce and evaluate their practical projects.

Future Pathways

9 Materials - Textiles

8 Materials - Wood (08VWK)

Mr Scott Arnold

Phone: 9350 5433 / Email: sarnold@norbert.wa.edu.au

Minimum Entry Requirements

No Minimum Entry Requirement

Description

This course will expand on skills developed in Year 7 and will extent students ability to create products in ways that are both practical and hands-on. Students will be trained in the safe use of hand tools and light machinery such as the disk sander, drill press and scroll saw. With creativity being a key aspect in Materials - Wood, there will be opportunities for students to develop and apply their own designs and creativity to a variety of projects.

Future Pathway

9 Materials – Wood

Digital Technologies

8 ICT - App Development (08APP)

Mr Greg Hulshoff

Phone: 9350 5433 / Email: ghulshoff@norbert.wa.edu.au

Minimum Entry Requirements

No Minimum Entry Requirement

Description

The Year 8 course in App Development introduces the students to creating a variety of different applications for use on the Android operating system.

The main aim of this course is to learn programming skills that can be used in future classes or for the students to go off and create the next viral app that is a must have for everyone. The online programming environment can be easily tested on any Android device providing there is an internet connection or connecting via a USB cable.

As all students have had an opportunity previously to use the Scratch programming environment, there is not such a steep learning curve for this course. It will provide an ideal foundation to the Year 9 Computer Science or Multimedia course, and would be useful to students considering either a Computer Science or Certificate in Information Technology in Year 11 or 12.

Students who intend to pursue a career in IT, or study at TAFE, or further their studies at University should choose this subject. In addition, programming skills learned can be advantageous in the future.

Future Pathways

9 Multimedia or 9 Computer Programming

8 Robotics and Game Programming (08ROB)

Mr Greg Hulshoff

Phone: 9350 5433 / Email: ghulshoff@norbert.wa.edu.au

Minimum Entry Requirements

No Minimum Entry Requirement

Description

The Year 8 course in Robotics introduces the students to some basic computer programming skills and logical thought processes. As an introduction the students learn to program a virtual robot, followed by operating a virtual machine.

The students will build and program their own robots, using the Lego Mindstorms sets available.

The second Term will consist of some basic game programming skills, where the students will create some computer games, like "Super Mario" or "1945" type flying games. The course uses the GameMaker program and the finished products are able to be taken home or used on any other computer.

This semester length course provides an ideal foundation to completing some programming courses in future years.

Performing Arts

8 Dance (08DAN)

Miss Laura Alban

Phone: 9350 5433 / Email: lalban@norbert.wa.edu.au

Minimum Entry Requirements

A willingness and capacity to be physically active and a creative passion and commitment for The Arts.

Description

In the study of dance students develop knowledge, understanding and skills through the experiences of performing, composing and appreciating their own dances and the dances of others.

In Year 8 Dance students continue to use improvisation skills learnt in Year 7 Dance to build on their movement vocabulary. They choreograph dances using the elements of dance (BEST) and choreographic devices for a purpose. They further develop their dance skills to explore the technical aspects of different dance styles. Students are given opportunities to present dance to an audience, further developing their

performance skills of retention and clarity of movement, projection, focus and expression. They discuss how dance can communicate meaning and how dance genres/styles differ.

The course caters for students with a high level of prior knowledge, skills and experience in dance as well as those students without prior knowledge and experience in dance.

Future Pathways

Year 9 Dance

8 Drama (O8DRA)

Miss Kerri Hilton

Phone: 9350 5433 / Email: khilton@norbert.wa.edu.au

Minimum Entry Requirements

A creative passion and commitment for The Arts.

Description

In Year 8, students will be given the opportunity to plan, refine and present drama to others by safely using processes, techniques and conventions of drama. Drama will be based on extended improvisations, or taken from appropriate published script extracts using selected drama forms and styles. Styles will include readers theatre, improvisation and realistic theatre.

This course is designed to foster creativity and a sense of self on stage through both group and solo work. Students will learn valuable theatre skills to equip them for further study and for their own self-worth.

Future Pathways

Year 9 Drama

8 Music (O8MUS)

Mr Chadwick Beins

Phone: 9350 5433 / Email: cbeins@norbert.wa.edu.au

Minimum Entry Requirements

A creative passion and commitment for The Arts.

Description

Year 8 Music is a semester-long course that provides students with a basic foundation of music. Through performance, listening and composition activities, students will develop their aural skills and understanding of musical theory and elements. Students will explore the history of pop music, learn basic keyboard skills and look at the importance of the music through the medium of film and television.

The course will focus on the four main areas of musical knowledge:

- Music literacy – aural/theory skills
- Composing and arranging – foundation understanding through technology
- Practical/performance skills – individual technique development for a private audience
- Analysis and context – application of the elements of music in context

While it is not a prerequisite of the course, all students are encouraged to undertake instrumental tuition on an instrument of their choice. Lessons can be taken at St Norbert College or with a private tutor outside of school. Participation in College ensembles and/or bands is also highly encouraged to enhance student understanding of the concepts studied in class.

It is strongly recommended that students enrolling in music in Year 8 remain in the program at least until the end of Year 10.

Future Pathways

Year 9 Music

8 Music Specialist (08MSS)

Mr Chadwick Beins

Phone: 9350 5433 / Email: cbeins@norbert.wa.edu.au

Minimum Entry Requirements

This course must be selected for any student undertaking instrumental or vocal lessons. Students must be currently learning at St Norbert College or with a private tutor outside of school. Students should elect to study 08MUS during Semester One.

Description

Year 8 Music Specialist is a semester-long course which compliments 08MUS students with an extension on their instrumental and vocal learning. Through performance, listening and composition activities, students will focus on their aural skills and further develop understanding of musical theory and elements. Students will explore a range of styles and genres including pop music, radio, blues and film music, and will use the understanding on their chosen instrument to enhance their creativity and knowledge of music.

The course will focus on the four main areas of musical knowledge:

- Music literacy – aural/theory skills
- Composing and arranging – application of aural/theory skills in context
- Practical/performance skills – individual technique development for a private audience
- Analysis and context – application of the elements of music in context

Participation in school ensembles and/or bands is mandatory for instrumental and vocal students. All ensembles except College Chorale are auditioned or specially selected.

It is strongly recommended that students enrolling in music in Year 8 remain in the program at least until the end of Year 10.

Future Pathways

Year 9 Music

Visual Arts

8 Media Arts (08MAR)

Mr Craig Mecham

Phone: 9350 5433 / Email: cmecham@norbert.wa.edu.au

Minimum Entry Requirements

A creative passion and commitment for The Arts.

Description

In Year 8, students are provided with opportunities to view media work within the context of the selected focus. Students build on media concepts from previous years, through expansion of the basic communication model to include new and emerging media technologies. They apply their understanding of intended audience, purpose and context in their productions and in their response to their own and others' media work. They explore current trends in how audiences use media.

Students begin to solve problems, work as a team, follow timelines and use processes and strategies to ensure safe and responsible use of media equipment.

Media Arts focus options: advertising (for example, billboard, 'junk' mail advertising, radio advertising), mass media (for example, blockbuster CGI film, specialist magazines, feature articles) or press (for example, newsletters, news magazine, journalistic photography) and broadcasting (for example, news channels, special interest programs, interactive entertainment). Students are expected to work within, or across, the following media in each year level: film, television, photography, print media, radio or online media.

Future Pathways

9 Media Arts

8 Visual Art (08ART)

Ms Amanda Marsh

Phone: 9350 5433 / Email: amarsh@norbert.wa.edu.au

Minimum Entry Requirements

A creative passion and commitment for The Arts.

Description

In Year 8, students have opportunities to use and apply visual art language and methods in their production process. They create 2D and/or 3D artwork with awareness of producing a personal response to given stimuli, through exposure to a variety of techniques.

Students are made aware of the need for safe visual arts practices when using tools and media, as well as how to present their artwork for display. Students become familiar with how and why artists, craftspeople or

designers realise their ideas. They have opportunities to evaluate the contexts of culture, time and place within artwork.

Students apply knowledge of techniques used by other artists and consider audience interpretation in the production of their own artwork.

Art forms:

2D (painting, printmaking, drawing, still photo, digital media, graphics, collage)

3D (ceramics, sculpture, installations)

Art styles:

Aboriginal and Torres Strait Islander art, Asian art, contemporary Australian/international artists, craftspeople and photographers.

Future Pathways

9 Visual Art
