PLANNING FOR UNCERTAIN TIMES

TIPS FOR STUDENTS IN PREPARING FOR A POTENTIAL DISRUPTION TO LEARNING

EACH AFTERNOON

- Take the following home: MacBook & charger; Student Diary; requirements for homework.
- Assignments: Do you have all resources at the ready to complete your assignments from home?
- Study: Make sure you have your study notes and resources on hand.
- Know all the usernames and passwords that you may need to access.
- If you have access/connection issues, visit IT soon.

IMPORTANT: Do not over pack your school bag at the end of each day. Just give consideration to those things you may need to access from home.

HOME PREPARATIONS

- Make sure you have a home learning space ready for use.
 - This space should be quiet, tidy and comfortable.
 - Remove all distractions.
- Make sure your laptop can easily connect to the home wi-fi.
- Have a good set of headphones (preferably with a microphone) to use.
- Consider having Microsoft Teams on more than one device.
- Remember to access MS Teams using your CEWA student account.
- Have the necessary stationery supplies available.

OTHER CONSIDERATIONS

- Be adaptable - not everything will go to plan, not everything will work perfectly. Consider how you can overcome this? How can you 'problem solve' so that you still participate in your classes?
- Make sure you follow your regular school day schedule. No sleep-ins or late nights.
- Remain active throughout the day.
 - Think about how much walking you would normally do at school.
- Don't spend all of your time in front of a screen
 - Even when you are on your breaks.
- Stay connected with your friends and support network. This is vital!
- Have at least one person in each of your classes that you can rely on to relay information that you may have missed.
